

Notice

Date: February 9, 2009

To: General Authorities; Area Presidencies outside
the United States and Canada

From: Office of the Presiding Bishopric
Information and Communications Systems Department (801-240-4357)

Subject: Webcast Service

THE CHURCH OF
JESUS CHRIST
OF LATTER-DAY SAINTS

Webcast technology is a means of electronically linking meetinghouses for the purpose of holding stake conferences, firesides, and training meetings. This is particularly helpful when long distance travel is required, or when space limitations prevent holding a meeting in one location. If you have broadband Internet service in your meetinghouses, you may order equipment from Distribution Services to create and receive webcasts (www.ldscatalog.com).

More information about this service, including instructions on how to create or receive a webcast, is available on the Internet at clerk.lds.org/webcast.

This notice is being distributed in English worldwide. If it is needed in other languages, please forward requests to the Publications and Media Project Office at Church headquarters (1-800-453-3860, ext. 2-2933). 08322
